Do you text more than you email?

If you do, you can configure your Starfish emails to come to your phone as a text in addition to an email! Here’s how:

**Step 1** Log into Starfish directly or go through Blackboard.

**Step 2** Click on your name in the top left hand corner of the screen.

**Step 3** Select Institutional Profile.

**Step 4** In the box titled Alternate Email, type your 10-digit cellphone number followed by your carrier’s text address:

- AT&T: @txt.att.net
- Alltel: @message.alltel.com
- Boost: @myboostmobile.com
- Sprint: @messaging.sprintpcs.com
- T-Mobile: @tmomail.net
- US Cellular: @email.uscc.net
- Verizon: @vtext.com
- Virgin Mobile: @vmobl.com

**Step 5** Check Also send notifications to my alternate email address.

**Step 6** Click Submit. That’s it – it’s that simple!

Don’t forget to check out the Starfish Support Website for additional information and tutorials!
