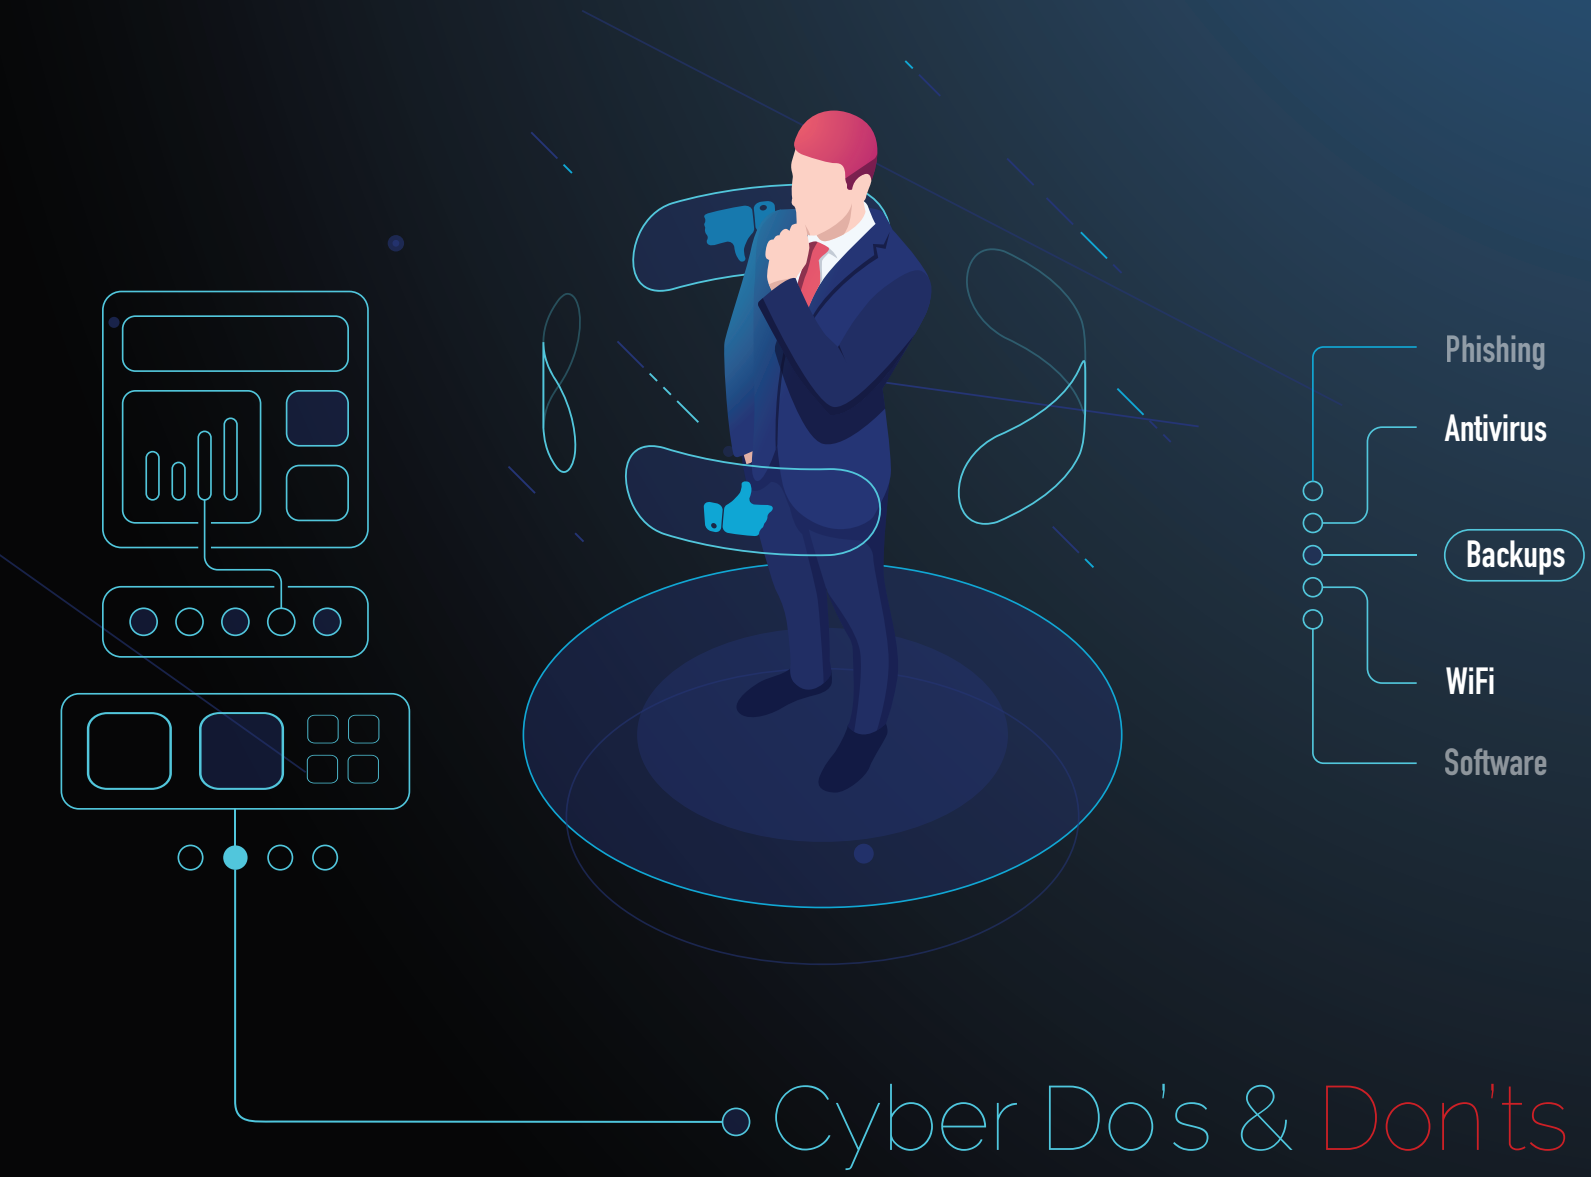
# DATA ASSURED



## Cyber Do's & Don'ts

In Partnership With:

AMERICA'S SBDC DELAWARE | Small Business Development Center

Presented By:

NORTH DAKOTA SMALL BUSINESS DEVELOPMENT CENTERS

*Your Ideas - Our Expertise - Your Success*

| DO'S: | DON'TS: |
| --- | --- |
| Use unique complex passphrases and change them regularly | Open attachments or click links from unknown sources |
| Turn on encryption on all devices | Use free public WiFi without a VPN |
| Regularly backup all your data with version controlled backups | Share passphrases or use the same phrase for multiple accounts |
| Use antivirus/antimalware on all devices | Scan random QR codes or accept random Airdrops |
| Keep all software and OS's up to date | Install apps or software from unknown sources |
| Pay attention to possible signs of phishing | Recycle old devices without properly wiping all data |
| Educate all employees | Log into any personal accounts on public computers |
| Create a data breach response plan | Leave unused services running on your devices. *Ex. Bluetooth* |
| Use multi-factor authentication when possible | Plug in random portable devices |
| Get a cybersecurity insurance policy | Visit insecure websites (Sites without the "S" in HTTPS) |
